

AskCore Executive Intelligence Solution

For Health Techs & Systems stuck in Snowflake stall-out

Health systems and health-techs are deep into Snowflake but still stuck. Data is fragmented, Excel drives decisions, and IT can't keep up. Executives spend hours validating reports instead of acting on them. The result: delayed care, lost revenue, and low trust in the data.

What's holding you back

- Reacting instead of proactively managing real-world supply conditions
- Constant disruptions eroding operational agility
- Bloated inventory strategies that tie up cash flow and trigger bullwhip effects

What success looks like

- › Proactive insights to guide the right operational decisions
- › Predictive ability to anticipate supply constraints and avoid sole-sourcing risks
- › Greater visibility across multiple tiers of your supplier network
- › Agile capabilities to meet customers' evolving requirements

How evolv helps

evolv delivers a branded decision layer that **turns Snowflake into action – fast.**

Our team aligns IT and business around **outcomes, not tools.**

We **drive adoption, build trust, and accelerate delivery** with the right mix of product, engineering, and change leadership.

Why evolv?

- **We build for speed.** Visible business value in weeks, not quarters.
- **We embed adoption.** Enablement is baked in – because shelfware doesn't win.
- **We refuse compromise.** Outcomes delivered without cutting corners. Nobody else does that.
- **We are purpose-built.** Designed for Snowflake and the modern data stack from day one.
