

# Governance that Scales

From Compliance Burden to Strategic Advantage

You've invested in platforms and built reports, but trust is missing – Metrics conflict, access is inconsistent, and audits are painful. evolv helps you build governance that's secure, usable, scalable, and built for speed. Because governance isn't about slowing down – it's about unlocking growth responsibly.

## What's holding you back

- No single source of truth
- Inconsistent access controls & lineage
- Manual data wrangling & reactive issue resolution
- Siloed ownership and unclear roles
- Compliance gaps and audit risk
- “We can't trust our reports – numbers change depending on who pulls them”

## What success looks like

- Data discovery in minutes – not days
- Reduced audit prep time and stronger compliance posture
- Sensitive data protected with proper access controls
- Business adoption of governance practices
- Continuous measurement and improvement

## How evolv helps

**evolv builds agile governance frameworks** that balance control and usability.

We embed stewardship, policy enforcement, and lineage tracking – so **your data is trusted, secure, and ready to drive decisions.**

We don't just check boxes – we create **governance that protects enterprise value and accelerates insight.**

## Why evolv?

- **Governance built for speed, trust, and scale** – not just control
- **Embedded quality, lineage, and policy enforcement from day one**
- **Integrated with your existing environment** (catalogs, platforms, and workflows)
- **Clear roles, ownership, and stewardship** across teams
- **Focused on business impact**, adoption, and measurable outcomes
