

# Unlock Hidden Savings: Transform Audit Data Into Measurable ROI

Turn fragmented evidence and unpredictable audit costs into measurable savings

Customers overspend on audits because auditors re-request evidence in GRCs, controls are inconsistently maintained, evidence isn't normalized across frameworks, and past exceptions lead to costly follow-up testing. Customers lack cost visibility—no benchmark, no forecasting.

## What's holding you back

- Inaccurate or incomplete benchmarking
- Weak evidence mapping & reuse logic
- Over-simplified audit simulation models
- Poor partner/auditor alignment
- Lack of financial-grade reporting for CFOs

## What success looks like

- › Audit costs materially decrease  
Prep time drops significantly
- › CFOs gain clear cost benchmarks and forecasts
- › Audit simulations guide decisions
- › Customers see measurable ROI
- › Partners align on reuse standards

## How evolV helps

### Builds cost intelligence engine

with benchmarking, evidence-reuse bundles, and simulation modeling

### Normalizes GRC audit data

enabling apples-to-apples cost comparisons and forecasting

### Delivers CFO-friendly dashboards

showing cost curves, deltas, and ROI projections

## Why evolV?

- **Audit cost optimization** frameworks CFOs trust
- **Deep** GRC data modeling and Snowflake analytics expertise
- **Financial-grade** reporting tied to measurable savings
- **Experience** aligning CFOs, GRC, auditors, and partners
